Professional Summary

Backend Software Engineer with 4+ years of experience in designing, developing, and optimizing scalable backend systems and APIs. Skilled in Python, Java, Go, Django, FastAPI, React and microservices architecture with strong expertise in cloud technologies (AWS S3, EC2, Lambda, SQS), databases (PostgreSQL, MongoDB, MySQL), and containerization (Docker). Proven track record of improving system performance, reducing operational overhead, and delivering high-quality software in Agile environments.

Core Skills

- **Languages & Frameworks:** Python, Java, Go, Django, FastAPI, ReactJS
- **Databases:** PostgreSQL, MongoDB, MySQL, MSSQL, RDBMS, NoSQL
- **Cloud & DevOps:** AWS(S3, EC2, Lambda, SQS, Pinpoint), Docker, Git
- **Architecture& APIs:** RESTful APIs, Microservices, Monolithic, System Design, API Security
- **Messaging & Caching:** Redis, WebSockets, AWS SQS
- **Others:** Data Structures & Algorithms, Multithreading, Unit Testing

Professional Experience

Developer – III, Software Engineer

US Technologies, Bengaluru | Nov 2025 – Sep 2026

Intel (Client)

- Worked on Python FastAPI Microservices to handle and transform data for other microservices.
- Built **REST APIs** and provided support for existing functionalities.
- Wrote unit and integration tests to maintain high code quality and coverage.

Sr. Software Engineer

Innoventes Technologies, Bengaluru | Dec 2024 – Oct 2025

Amagi Media Labs, Bengaluru (Client)
Consultant

Project: Amagi Licensing System(Python, FastAPI, MongoDB)

- Designed and developed a high-performance license management microservice using **Python & FastAPI**, handling 10,000+ daily validation requests.
- Implemented automated data sync with **MongoDB** & cron jobs, reducing manual overhead by 85% and ensuring real-time updates.
- Built **REST APIs** for license management, system health monitoring, and batch processing.
- Built license management dashboard using **ReactJS** to manage the licenses**.**
- Optimized caching & cleanup tasks using **Redis**, improving api response time by 50% and data consistency.
- Wrote unit and integration tests to maintain high code quality and coverage.

Project: SFSync (Go, Gin, PostgreSQL)

- Worked on a synchronization service handling 50,000+ daily Salesforce sync operations.
- Integrated **AWS SQS Queue** for real-time event capture and processing.
- Built **RESTful APIs** for order management & product synchronization.
- Added Slack alerting system, reducing mean-time-to-resolution by 45%.

Backend Developer

PANORBIT, Bengaluru | Apr 2023 – Jul 2024

Project: Marko (Internal)

- Architected a microservices-based internal marketing tool using **Python & Django**.
- Optimized video asset processing via **AWS Lambda**, boosting speed by 10%.
- Designed a collaborative review system (similar to Ruttl/Pastel) with version control.
- Implemented a file management system for efficient storage & retrieval.

Project: Unbox Health (Client)

- Revamped product comparison platform backend with **FastAPI**, improving API performance by 20%.
- Built web scraping pipelines storing results in AWS S3.
- Used threading & pagination to handle high data loads efficiently.

Project: ODO (Internal)

- Developed a multiplayer board game backend using Django, Redis, and **WebSockets** for real-time communication.
- Stored and managed game assets using PostgreSQL & AWS S3.
- Implemented secure authorization using AWS Pinpoint.

Systems Engineer

Tata Consultancy Services, Hyderabad | Nov 2020 – Jun 2022

- Developed and maintained REST APIs for client Davita using **Python & Django**.
- Optimized SQL queries, reducing API latency and improving scalability.
- Collaborated in Agile teams, debugging backend issues and enhancing system stability.

Personal Projects

QMoney (CRIO Fellowship Project, 2022–23)

- Built a **stock analyzer tool** using Java & Spring Boot to assist portfolio managers.
- Integrated Tiingo APIs for stock data retrieval and storage in AWS S3.
- Improved performance by 50% using multithreading.

Coding Contest (CRIO Fellowship Project, 2022–23)

- Developed a HackerRank-like platform using Java, Spring Boot & TDD.
- Designed service & repository layers with optimized queries, improving data fetching by 10%.

Certifications

- Cutshort Certified Java – Basic
- Cutshort Certified Data Structures - Advanced

Education

B.Tech. in Computer Science & Engineering
Feroze Gandhi Institute of Engineering and Technology, RaeBareli | 2016 – 2020
CGPA: 7.3
